PROJECTS

Web portal to create knowledge on cultural heritage in South India

- Design a web portal to create knowledge on cultural heritage in South-India and promoting the rich traditions of Tamil Nadu's Thiruvizha festivals.

PROJECT REVIEW EVALUATION AND ANALYSIS SYSTEM - Final year project (In progress)

- Developed a web-based platform that connects startups and investors using AI-driven matching based on profiles, interests, and business domains. The system ensures secure communication, fraud detection, and transparent financial tracking to reduce investment risks and improve decision-making efficiency.

End-to-End Customer Behavior Analysis and Sales Trend Dashboard using SQL Server & Power BI- Internship project

- Designed and developed an interactive business intelligence dashboard to analyze customer behavior and sales performance using SQL Server and Power BI. Built an end-to-end data pipeline by integrating multiple event-level datasets, including Login, Menu, Page Visit, Add to Cart, and Purchase, to model the complete customer journey.
